

# metaphacts

## Front-end Developer

### About metaphacts

metaphacts is a growing high-tech software company offering metaphactory, an end-to-end platform to ease the onboarding into the world of enterprise knowledge graphs - from knowledge graph management, through rapid application development, to end-user oriented interaction. Our team of experts develops the leading knowledge graph management platform for customers in areas such as engineering and manufacturing, life sciences, cultural heritage, and business.

Customer needs and customer satisfaction are central to our company and our development team. As a member of our team, you have the opportunity to act at the interface between research, innovation, product development, and our end users. You help us bring the latest research results to our customers through our product metaphactory.

### Your Role

You will be part of our specialized and small development team. Together with the team you will plan the next sprint and discuss proposed solutions to problems involving data management, performance, user experience, algorithms, and user interfaces. You take responsibility to solve problems by delivering high-quality code that will be part of our product and will be immediately used by our customers.

As a front-end developer, you know how to visualize data, build beautiful interfaces and explain complex settings visually. Your focus is on improving user experience and you take a customer-centric approach to your work, always keeping the customer's view in mind.

### Desired Skills & Experience

You should have a degree in Web Design, Product Design, Computer Science or a related discipline with strong implementation skills. In addition, we are looking for someone with:

- Profound skills & knowledge in Web-based front-end development, in particular JavaScript, JSON, HTML5 and CSS
- Modern Web technologies: Web Components, Typescript, NodeJS, Responsive Design, Reactive Programming (e.g. ReactJS)
- Experience in UI and UX design
- Familiarity with version management systems, bug trackers, and agile development
- Experience with semantic technologies (Semantic Web, RDF, SPARQL, OWL) and/or (graph) databases is a plus
- High amount of personal reliability and enthusiasm for work
- Proficiency in English

## Why should you join us?

Do you want to be part of a team that strives to develop cutting-edge products and solutions for their customers and users? Then metaphacts is right for you!

These are just some of the perks and benefits that metaphacts offers its employees:

- Become part of a young, dynamic, and highly motivated international team with flat hierarchies and startup spirit. In our small, specialized team your contributions make a difference!
- As a valuable team member, you can bring in your own ideas and make personal progress while actively advancing our products and offerings.
- Build up your personal network by helping us organize and participate in community events like meetups and conferences.
- We offer flexible work times, competitive compensation, and hardware of your choice.

## Interested?

We look forward to receiving your application!
