

## ACCELERATE KNOWLEDGE DEMOCRATIZATION IN THE ENTERPRISE

### **Empower end users to experience & consume data in context**

metaphactory abstracts from the underlying complexity of a Knowledge Graph and allows you and your users to consume data intuitively and in context and connect the dots between individual pieces of information.

### **Collaborate across user groups & capture hidden expert knowledge**

With metaphactory, business users, domain experts, application engineers and knowledge graph engineers can contribute to the semantic model, transforming data into reusable and company-wide available knowledge.

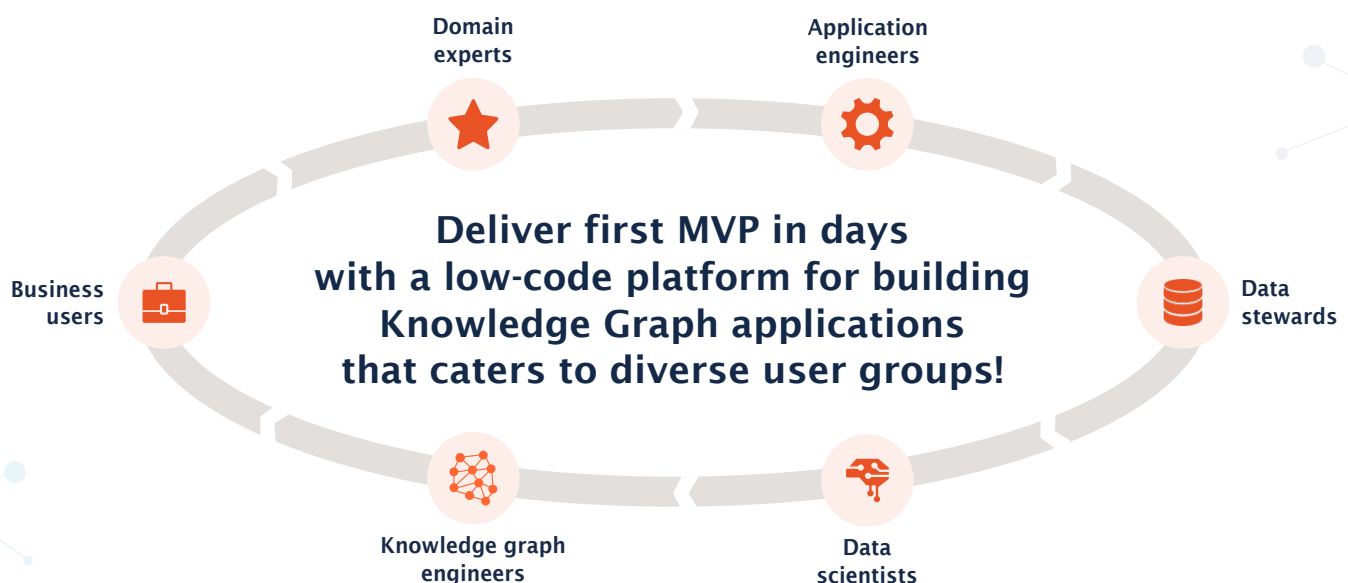

### **Improve data literacy through meaningful & actionable insights**

A Knowledge Graph provides a machine-understandable view of your data; metaphactory makes that view human-understandable through intuitive exploration, search and visualization interfaces that deliver actionable insights.

### **Build Knowledge Graph apps that allow you to adapt as you go**

metaphactory accelerates your time-to-market for new digital services and products by allowing you to start with a targeted business case, iterate often and extend the use case, semantic model and data sources on the fly.

# Your End-to-end Knowledge Graph Platform

## KNOWLEDGE GRAPH MANAGEMENT

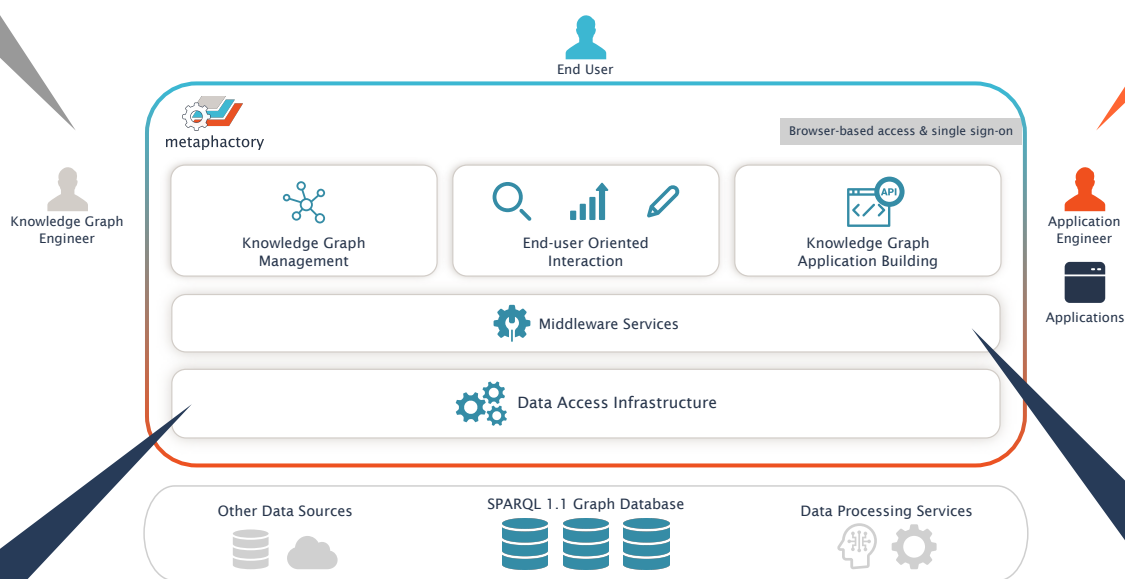

Master the complexity of Knowledge Graph assets such as ontologies, taxonomies or data catalogs & allow domain experts to contribute to & drive knowledge modeling

## END-USER ORIENTED INTERACTION

Share the same data, views & concepts among all relevant stakeholders & enable enterprise-wide collaboration & data validation during the entire lifespan of a use case

## KNOWLEDGE GRAPH APPLICATION BUILDING

Rapidly build data-driven apps that support business needs & deliver MVP in days through an agile approach that allows to continuously extend & adjust the use case, model or data

## DATA INTEGRATION & FEDERATION

Integrate & provide a unified view on distributed & heterogeneous data sources like graph databases, relational databases, REST APIs or ML/AI systems

W3C®

Run anywhere

F<sub>indable</sub> A<sub>ccessible</sub> I<sub>nteroperable</sub> R<sub>eusable</sub>

## MIDDLEWARE SERVICES

Enable the composite enterprise with open standards (W3C), open interfaces (REST & W3C) & out-of-the-box adapters (e.g., Tableau)

## Get started

Get started with metaphactory today to accelerate your Knowledge Graph project:

» <https://metaphacts.com/get-started>

Also available on aws marketplace

## Online demo

Experience metaphactory live on our public demo system:
